

High integrity Bolting &
Tensioning specialists

An aerial, black and white photograph of a busy port or shipping yard. The image shows numerous stacks of shipping containers, some being moved by large gantry cranes. The scene is divided by a large blue diagonal graphic element that runs from the top left towards the bottom right.

Creating a world of
trouble-free connections

WHO WE ARE

Pilgrim International Ltd is a leading British engineering company based in Oldham, Greater Manchester. We specialise in bolting and positioning systems, tension systems, drive-up systems, service and pumps.

The company's history goes back to the 1940s when the hydraulically installed Pilgrim Nut was invented to solve problems in maritime engineering with ship propeller installations.

Our tradition of innovative engineering has continued over the decades helping the company to expand into other sectors including power generation, renewables, oil and gas, metal and mining.

What we do

Bolting and positioning systems

Tension systems

Drive-up systems

Service

Pumps

Pilgrim has vast technical experience of high integrity bolting and tensioning, high pressure hydraulic systems and exotic material machining with documented traceability. We provide a comprehensive range of standard and tailored products.

Why you benefit

Based on many years of experience and innovation, our products and services remove uncertainty, save time and improve safety, performance and total cost of ownership for clients.

We understand clients' needs and create innovative designs for them. Our high integrity bolting and tensioning solutions ensure clients can couple and decouple accurately, consistently and safely.

How we do it

Our company has over 60 years of specialist experience and a highly knowledgeable and committed team. We provide trusted, innovative high-quality engineering products and services around the world. We support clients across a wide range of sectors directly and through a network of regional agents who are guided by our company values and business drivers.
